PROFILE

Software engineer and MSc Artificial Intelligence and Data Science student with five years of experience building web and mobile products. Trains and evaluates PyTorch models, integrates AI into applications, and reviews AI outputs for training quality. Has taken products from prototype to release and delivered in startup teams.

TECHNICAL SKILLS

AI and ML: PyTorch, self-play reinforcement learning, model evaluation, NLP, LLM APIs, prompt workflows, RAG, OCR, Whisper speech-to-text, data annotation and quality review.

Engineering and data: Python, TypeScript, JavaScript, FastAPI, Node.js, React, React Native, PostgreSQL, SQLite, REST APIs, Docker, Azure, Google Cloud, Git, automated testing.

SELECTED AI AND DATA PROJECTS

UK Merchant Categoriser - local banking NLP | personal project

• Built a privacy-first PyTorch service that redacts sensitive transaction text before classifying it into 21 UK spending categories with MiniLM embeddings and an MLP head.

• Used merchant-grouped train/validation/test splits and model evaluation; achieved 0.992 macro F1 on a 372-example synthetic/sandbox test set.

Connect 4 AlphaZero - self-play AI agent | personal project

• Built a PyTorch dual-head ResNet and Monte Carlo Tree Search agent trained through self-play, with an evaluation arena for candidate checkpoints.

• Exposed the agent in a FastAPI web app and added background learning from completed human games.

PayLens - fintech OCR and voice interface | personal project

• Built an API that reads bank account numbers from photos with Google Vision OCR and checks them through Paystack; used Whisper and an LLM to turn spoken payment requests into structured JSON.

EXPERIENCE

Domain Expert, AI Training - Ethos | Sep 2026 to Present | Remote

• Annotate data, chat conversations and documents for AI training.

AI Evaluation and Data Annotation Contractor - Aether | 2026 to Present | Remote

• Score AI responses against rubrics for accuracy and guideline fit; evaluate images and search results and analyse model responses.

• Annotate video and audio training data, reprompt models, and check ratings and labels for consistency.

Mobile Application Developer - MyCityLogistics | Nov 2025 to Mar 2026 | Remote

• Led product delivery from concept to App Store and Google Play release as sole designer and lead developer.

• Built iOS and Android order flows, guest checkout and secure sessions; debugged platform issues and managed releases.

Fullstack Software Engineer - Ruvira | May 2025 to Sep 2025 | Remote

• Built a therapy web app MVP in one week with REST APIs, real-time communication and AI-powered insights; tuned the integration for reliable responses.

Fullstack Software Engineer / Technical Director - Nutlip | Nov 2023 to Aug 2025 | Remote

• Led web and mobile architecture for a white-label real estate platform using Next.js, React Native and TypeScript.

• Migrated the backend from Express to NestJS, built real-time data sync and identity verification, and directed sprint planning against business goals.

EDUCATION

MSc Artificial Intelligence and Data Science - University of Hull, UK | Sep 2026 to 2027

BSc Computer Science - Federal University of Petroleum Resources, Effurun, Nigeria | Jan 2026
Second Class Upper, CGPA 3.96/5.0

ADDITIONAL EVIDENCE

Open source: Puppeteer contributor. **Awards:** 1st place, Arbitrum Hackathon; 2nd place, The Graph Protocol Hackathon.
Certification: Oracle Cloud Infrastructure 2025 AI Foundations Associate.
